WARP provides the field solvers and diagnostics. The authors describe the design of a system for real-time detection of QRS complexes in the electrocardiogram based on a single-chip microcontroller Motorola 68HC The existing learning process for electro pneumatic courses conducted in the classroom does not emphasize on simulation and complex practical aspects. It uses a Geiger-Muller tube as a radiation detector, which converts gamma rays. When we used what we have learned of microprocessors and adjust the program to calculate and show the measures in the LCD keypad selected the modes. Recently investigators have developed food image databases for use across experimental studies examining appetite and eating behavior. This work is conducted under the auspices of NRL. Significant effort was devoted to software development of feedback control. In addition, a strong linkage to diagnostic measurements was made by modeling plasma jet experiments on PLX to support benchmarking of the code. Personnel of military forces have close contact with natural habitat and usually encounter with bite of arthropods and prone to be infected with arthropod borne diseases.
