Recent reviews Eastwood et al. Recent innovations in crop breeding, tillage, and information technology make labour supervision easier and reduce diseconomies of scale of large operations. The technology and the nature of farming is itself changing in favour of large farms.

Genetically modified varieties have facilitated broad adoption of zero tillage. Google Buzz Stumble Upon Delicious. Other recent articles on the topic are: Large farms that employ professional managers may also enjoy an efficiency advantage under conditions of rapidly changing markets and technologies, especially for new crops and new areas.

Against this backdrop, the World Bank, under the leadership of Managing Director, authors argue that outside investors have contributed to poverty and loss of livelihoods, for example, through displacement of local people without proper compensation, land being given away well below its potential value and approval of projects that were only feasible because of additional subsidies.
